InVid Tablet

2 Megapixel HD Temperature Measurement & Face Recognition Tablet

The InVid PAR-P2TEMPTABLET HD Temperature Measurement & Face Recognition Tablet allows you to easily secure your business against illness by automatically detecting if a visitor is wearing a mask and at a healthy temperature before being admitted into the building. Integration with your current access control system to automatically unlock entrances eliminates the need for an employee to monitor the entrance.

FEATURES

8 INCH LCD SCREEN

1280 x 800 HD screen resolution.

TEMPERATURE MEASUREMENT

Non-contact high-accuracy IR body temperature measurement with an accuracy of $\pm .54^{\circ}\text{F}$ and a measuring distance of up to **one foot**.

FACEMASK DETECTION

Dual 2 megapixel 4mm lenses designed for real-time face mask detection to ensure only those following guidelines are granted entry. Measuring distance up to **6.56 feet**.

FACE RECOGNITION

Face liveness detection technology distinguishes real faces from fake spoof attacks. Highly accurate face recognition using deep learning algorithm. Can store up to **20,000 faces** and read at a rate of **.5s** per person with a **99.70%** recognition accuracy.

MULTIPLE MOUNTING OPTIONS

Choose from a desktop, wall mount, turnstile, or stand bracket for mounting and installation.
