# INTRODUCTION

**OPENGATE** is a **Groundbreaking Weapons Detection System** designed for the automatic screening of people in transit, including their luggage, backpacks, and bags, for the detection of **Mass Casualty Metal Threats**, such as high caliber assault weapons and IED devices

- ✓ **OPENGATE** is the first wire-free, screening portal consisting of two independent and self-powered pillars, with each pillar equipped with a support base and electronic analysis system.
- ✓ Contrary to Metal Detector Gates, **OPENGATE** does not require a mechanical and electrical connection between the two transducers that define the passageway.
- ✓ **Acoustic and optical signals**, located at the top of the pillars, provide simultaneous status and alarm indications.
- ✓ **OPENGATE** features a near zero rate of nuisance alarms, and operates with very high transit flow, without the need for the divestiture of non-threat items.
- ✓ It is portable, elegant, easy to set up and ready to use with no installation required, including the setting and assembly of mechanical and electrical parts.
- ✓ Its structure makes it suitable for indoor and outdoor operations, even in conditions of exposure to rain and sunlight, in all environmental conditions that are compatible with security screening operations.
- ✓ The extreme portability allows quick relocation of the gate, offering the most suitable solution for places where, for safety reasons, the checkpoint must be moved from obstructions after use.
- ✓ If required, the detection and signaling parameters can be easily set via the **OPENGATE App**, designed for smartphones or tablets.

# HIGHLIGHTS

- **DETECTION TARGET**

Mass casualty shooting weapons and IED
